

### **Important information:**

- Ensure that your hands are free of traces of hand lotion or soap, when handling items in your aquarium.
  
- To avoid damaging the fishes' mucus membranes, moisten your hands before handling your fish!
  
- If you injure yourself on the dorsal spines of a discus fish (puncturing your skin), please press the tissue (e.g. of your finger) press until a drop of blood comes out. This cleans the wound and helps to prevent an infection.
  
- Never mix discus fish caught in the wild, Asian captive breeds and STENDKER Discus Fish.
