

Parasite-free discus fish

Our STENDKER discus fish are NOT parasite-free, but are free of tapeworm and 'discus plague'. A strong immune system ensures that our discus have strong defences against common parasites.

We recommend feeding with our popular STENDKER Good Heart discus food to ensure that the fish continue to benefit from a strong immune system. Our discus food is perfect for use as a sole feed, contains everything a discus needs for a healthy diet and is also enjoyed by other fish species.
